

Symantec Virus Scanning Software Instructions

The new version of Norton AntiVirus is available at the Help Desk located in Graff Hall room 206. Each person receiving a copy of Norton Antivirus will need to return the software upon ending employment and/or ending current student status with OTC.

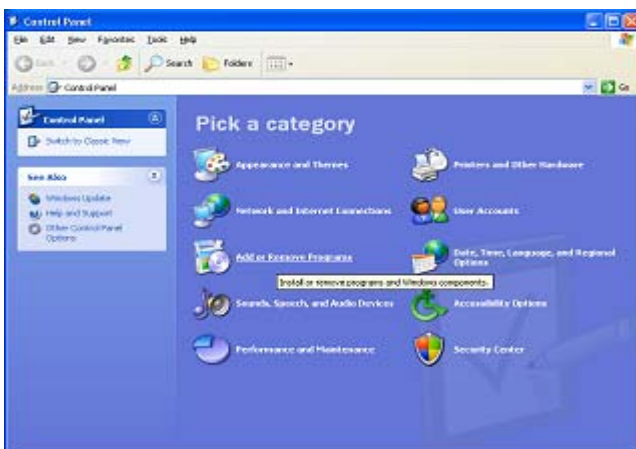

Before you can install Symantec 10.0.1.1000, you must uninstall any/all old versions of antivirus software previously installed. Keep in mind, Symantec 10.0.1.1000 will only work on Windows 2000 or Windows XP.

To Uninstall Previous Version of Norton AntiVirus

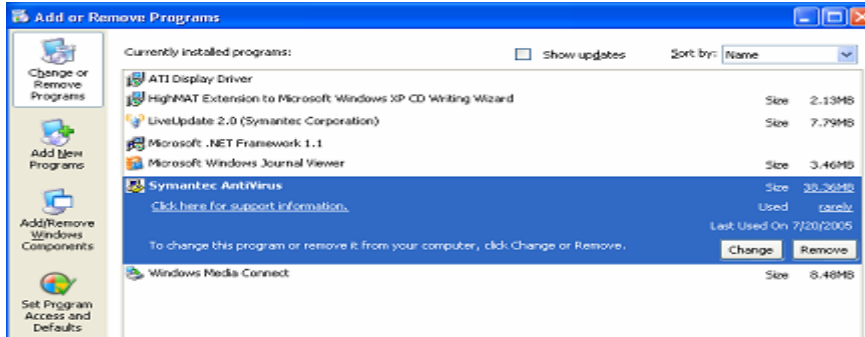

1. Close all open programs
2. Click on control panel in start menu

3. Click on Add/Remove programs in control panel

4. Click on Symantec AntiVirus

5. Click on Remove

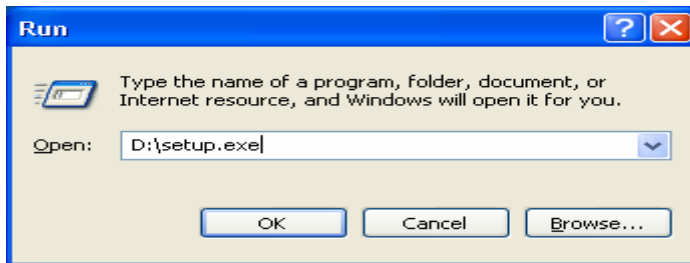

6. Click on Yes to Remove AntiVirus

7. Click Yes when asked to Restart your computer
