

Symantec Virus Scanning Software Instructions for Macintosh

The new version of Norton AntiVirus is available at the Help Desk located in Graff Hall room 206. Each person receiving a copy of Norton Antivirus will need to return the software upon ending employment and/or ending current student status with OTC.

Before you can install Symantec 10.0.1.1000, you must uninstall any/all old versions of antivirus software previously installed.

1. Place CD in Drive
2. Double click on "Norton AntiVirus 9.0 CE
3. Double click on either "Install for OS X" or "Install for OS 9"

OS X

1. Double click on Norton AntiVirus Installer
2. Click Continue
3. Click Continue
4. Click Continue
5. Click Continue
6. Click Agree
7. Pick Destination and click Continue
8. Click Install
9. Enter your local admin password
10. Click "Continue Installation"
11. Click Restart

OS 9

1. Double click on Install Norton AntiVirus
2. Click Continue
3. Click Accept
4. Click Continue
5. Pick installation location and click Install
6. Click Ok
7. Click Full Protection
8. Click Scan all known formats
9. Click Set Preferences and Continue
10. Click Restart
