ABOUT THE CENTER OF EXCELLENCE

The Center of Excellence for Tobacco-Free Campus Policy was established in 2004 to collect and share the best practices to help institutions develop, implement and successfully sustain a tobacco-free campus policy in their unique institutional settings.

The methods used to help institutions include: workshops; presentations at regional and national professional conferences; presentations at health consortia; webinars; teleconferences; and on campus consultations at higher education institutions throughout the U.S. In addition, the Center of Excellence maintains a web presence with more information and resources available at www.otc.edu/tobaccofree. Over the past six years, the Center of Excellence's clientele has expanded beyond community colleges, colleges and universities to include hospitals, government entities, health service agencies and private businesses.

The Center of Excellence is supported by Ozarks Technical Community College and revenues generated from its services. For more information about how the Center of Excellence for Tobacco-Free Campus Policy can help your institution or organization, call (417) 447-8887 or e-mail patterst@otc.edu.
